

Wildlife Gardening Forum

List of scientific papers and published articles on ecology and biodiversity in gardens

Compiled by Marc Carlton and Steve Head

This list is not exhaustive, and of course will need constant updating. We hope people will still find it useful, especially with the doi.org links taking you direct to those publications accessible from the web. Please let us know of other publications that you consider should be on this list

Ansell, R., Baker P. and Harris S. 2001. The value of gardens for wildlife — lessons from mammals and herpetofauna. *British Wildlife* 13: 77–84.

Baker, G., 1997. A Framework for the Future: Green Networks with Multiple Uses In and Around Towns and Cities. English Nature Research Report 256. ISSN 0967-876X.
